Contents for Volume 129

Number 1, 7 November 1987

CULPEPPER, M. I. and FRANCIS, K. T., An Anatomical Model to Determine Step Height in Step Testing for Estimating Aerobic Capacity . . . 1

HSU, J-P., Stochastic Modeling of Bacterial Adhesion: a Two-step Mechanism with Nonlinear Adhesion Rate 9

CHEER, A. Y. L. and KOEHL, M. A. R., Paddles and Rakes: Fluid Flow Through Bristled Appendages of Small Organisms 17

LILJENSTRÖM, H. and BLOMBERG, C., Site Dependent Time Optimization of Protein Synthesis With Special Regard to Accuracy 41

HOUSTON, A. I. and MCNAMARA, J. M., Singing to Attract a Mate: a Stochastic Dynamic Game 57

JEAN, R. V., A Mathematical Model and a Method for the Practical Assessment of the Phyllotactic Patterns 69

TAKAHASHI, M., A Model for the Spatio-temporal Organization of DNA Replication in Mammalian Cells 91

HORIE, S. and TAKIZAWA, N., Molecular Characteristics of Many Hemoproteins: A Survey of Molecular Weights, Sedimentation Coefficients, Other Molecular Parameters and Amino Acid Compositions 117

LETTER TO THE EDITOR

JAMES, W. H., Hormone Levels of Parents and Sex Ratios of Offspring 139

Number 2, 21 November 1987

KAUFMAN, M. and THOMAS, R., Model Analysis of the Bases of Multistationarity in the Humoral Immune Response 141

MIZRAJI, E., ACERENZA, L. and LIN, J., Viscoelastic Models for Enzymes with Multiple Conformational States. 163

GARTE, S. J., Activation of Multiple Oncogene Pathways: A Model for Experimental Carcinogenesis 177

SCHUSTER, S. and HEINRICH, R., Time Hierarchy in Enzymatic Reaction Chains Resulting from Optimality Principles 189

LEGOVIĆ, T., Determination of Parameters for Food Web Models from Field Observations 211

AWERBUCH, T. E. and LUSTMAN, L., A Mathematical Model for Determining Minimal Inhibitory Concentrations (MICs) via Diffusion Assays . 219

MCKINNEY, J. D. and PEDERSEN, L. G., Do Residue Levels of Polychlorinated Biphenyls (PCBs) in the Human Blood Produce Mild Hypothyroidism? . 231

ROWE, G. W., A Dynamic Game Theory Model of a Diploid Genetic System . 243

JAMALUDDIN, M. P. and KRISHNAN, L. K., A Rate Equation for Blood Platelet Aggregation 257

Number 3, 7 December 1987

AZUMA, A. and OKUNO, Y., Flight of a Samara, *Alsomitra macrocarpa* . 263

BELOVSKY, G. E., Foraging and Optimal Body Size: An Overview, New Data and a Test of Alternative Models 275

MILLER, M. J., Sensitivity of RNA Synthesis to Actinomycin D Inhibition is Dependent on the Frequency of Transcription: A Mathematical Model 289

FUKSHANSKY, L. and STEINHARDT, A. R., Spatial Factors in *Phycomyces* Phototropism: Analysis of Balanced Responses 301

KOPPES, L. J., WOLDRINGH, C. L. and GROVER, N. B., Predicted Steady-State Cell Size Distributions for Various Growth Models 325

GROVER, N. B., WOLDRINGH, C. L. and KOPPES, L. J., Elongation and Surface Extension of Individual Cells of *Escherichia coli* B/r: Comparison of Theoretical and Experimental Size Distribution 337

VICKERS, G. T. and CANNINGS, C., On the Definition of an Evolutionarily Stable Strategy 349

LETTER TO THE EDITOR

HOFFMANN, G. W., A Critique of the Kaufman-Urbain-Thomas Immune System Network Theory 355

Number 4, 21 December 1987

ANNINOS, P., ANOGIANAKIS, G., APOSTOLAKIS, M. and THOMAS, G., A Neural Net Model for the Release of Prolactin During Pseudopregnancy in the Rat 359

BELINTSEV, B. N. BELOUSSOV, L. V. and ZARAISKY, A. G., Model of Pattern Formation in Epithelial Morphogenesis 369

KITNEY, R. I. and TALHAMI, H., The Zoom Wigner Transform and its Application to the Analysis of Blood Velocity Waveforms 395

LEIKIN, S. L., KOZLOV, M. M., CHERNOMORDIK, L. V., MARKIN, V. S. and CHIZMADZHEV, Y. A., Membrane Fusion: Overcoming of the Hydration Barrier and Local Restructuring 411

SAROFF, H. A., The Ionization of Clusters II. Pairwise Isotropic Interactions and Individual Site Binding Data 427

KOZLOV, M. M. and MARKIN, V. S., Model of Red Blood Cell Membrane Skeleton: Electrical and Mechanical Properties 439

LETTER TO THE EDITOR

SIZUO, Y., A Proof of a Neglected Proof 453

Index to Volume 129

ACERENZA, L. (see MIZRAJI, E.), 163
Actinomycin D inhibition, sensitivity of RNA synthesis is dependent on the frequency of transcription; a mathematical model, 289
Adhesion, bacterial, stochastic modeling; a two-step mechanism with nonlinear adhesion rate, 9
Aerobic capacity estimation, an anatomical model to determine step height in step testing for, 1
Aggregation, blood platelet, a rate equation for, 257
Alsomitra macrocarpa, samara, flight of, 263
Amino acid compositions of many hemoproteins, 117
Anatomical model to determine step height in step testing for estimating aerobic capacity, 1
ANNINOS, P., ANOGIANAKIS, G., APOSTOLAKIS, M. and THOMAS, G., A neural net model for the release of prolactin during pseudopregnancy in the rat, 359
ANOGIANAKIS, G. (see ANNINOS, P.), 359
APOSTOLAKIS, M. (see ANNINOS, P.), 359
Assays, diffusion, a mathematical model for determining minimal inhibitory concentrations (MICs) via, 219
Attraction of a mate, and singing; a stochastic dynamic game, 57
AWERBUCH, T. E. and LUSTMAN, L., A mathematical model for determining minimal inhibitory concentrations (MICs) via diffusion assays, 219
AZUMA, A. and OKUNO, Y., Flight of a samara, *Alsomitra macrocarpa*, 263

Bacterial adhesion, stochastic modeling; a two-step mechanism with nonlinear adhesion rate, 9
BELINTSEV, B. N., BELOUSSOV, L. V. and ZARAISKY, A. G., Model of pattern formation in epithelial morphogenesis, 369
BELOUSSOV, L. V. (see BELINTSEV, B. N.), 369
BELOVSKY, G. E., Foraging and optimal body size: an overview, new data and a test of alternative models, 275
Binding data, individual site, and pairwise isotropic interactions; the ionization of clusters, 427
Biphenyls, polychlorinated, do residue levels in the human blood produce mild hypothyroidism?, 231
BLOMBERG, C. (see LILJENSTRÖM, H.), 41
Blood, human, do residue levels of polychlorinated biphenyls (PCBs) produce mild hypothyroidism?, 231
Blood platelet aggregation, a rate equation for, 257
Blood, red cell membrane skeleton; electrical and mechanical properties of a model, 439
Blood velocity waveforms, the zoom Wigner transform and its application to the analysis of, 395
Body size, optimal, and foraging; an overview, new data and a test of alternative models, 275
Bristled appendages of small organisms, fluid flow through; paddles and rakes, 17

CANNINGS, C. (see VICKERS, G. T.), 349
Carcinogenesis, experimental, a model for activation of multiple oncogene pathways, 177
Cells, individual, of *Escherichia coli* B/r, elongation and surface extension of; comparison of theoretical and experimental size distribution, 337
Cells, mammalian, a model for the spatio-temporal organization of DNA replication in, 91

Cell, red blood, membrane skeleton; electrical and mechanical properties of a model, 439
Cell size distributions, steady-state, predicted, for various growth models, 325
CHEER, A. Y. L. and KOEHL, M. A. R., Paddles and rakes: fluid flow through bristled appendages of small organisms, 17
CHERNOMORDIK, L. V. (see LEIKIN, S. L.), 411
CHIZMADZEHEV, Y. A. (see LEIKIN, S. L.), 411
Cluster ionization; pairwise isotropic interactions and individual site binding data, 427
Conformational states, multiple, viscoelastic models for enzymes with, 163
CULPEPPER, M. I. and FRANCIS, K. T., An anatomical model to determine step height in step testing for estimating aerobic capacity, 1

Diffusion assays, a mathematical model for determining minimal inhibitory concentrations (MICs) via, 219
Diploid genetic system, a dynamic game theory model, 243
DNA replication in mammalian cells, a model for the spatio-temporal organization of, 91
Dynamic game theory model of a diploid genetic system, 243
Dynamic stochastic game; singing to attract a mate, 57

Electrical and mechanical properties of a model of red blood cell membrane skeleton, 439
Elongation and surface extension of individual cells of *Escherichia coli* B/r; comparison of theoretical and experimental size distribution, 337
Enzymatic reaction chains, time hierarchy in, resulting from optimality principles, 189
Enzymes with multiple conformational states, viscoelastic models for, 163
Epithelial morphogenesis, model of pattern formation in, 369
Escherichia coli B/r, elongation and surface extension of individual cells; comparison of theoretical and experimental size distribution, 337
Evolutionarily stable strategy, on the definition of, 349

Flight of a samara, *Alsomitra macrocarpa*, 263
Flow, fluid, through bristled appendages of small organisms; paddles and rakes, 17
Fluid flow through bristled appendages of small organisms; paddles and rakes, 17
Food web models, determination of parameters from field observations, 211
Foraging and optimal body size: an overview, new data and a test of alternative models, 275
FRANICS, K. T. (see CULPEPPER, M. I.), 1
FUKSHANSKY, L. and STEINHARDT, A. R., Spatial factors in *Phycomyces* phototropism: analysis of balanced responses, 301
Fusion, membrane; overcoming of the hydration barrier and local restructuring, 411

Game, dynamic, stochastic; singing to attract a mate, 57
Game theory dynamic model of a diploid genetic system, 243
GARTE, S. J., Activation of multiple oncogene pathways: a model for experimental carcinogenesis, 177
Genetic system, diploid, a dynamic game theory model, 243
GROVER, N. B., WOLDRINGH, C. L. and KOPPES, L. J., Elongation and surface extension of individual cells of *Escherichia coli* B/r: comparison of theoretical and experimental size distributions, 337
GROVER, N. B. (see KOPPES, L. J.), 325
Growth models, predicted steady-state cell size distributions for, 325

HEINRICH, R. (see SCHUSTER, S.), 189
Hemoproteins, molecular characteristics; a survey of molecular weights, sedimentation coefficients, other molecular parameters and amino acids compositions, 117
HOFFMANN, G. W., A critique of the Kaufman–Urbain–Thomas immune system network theory (letter), 355

HORIE, S. and TAKIZAWA, N., Molecular characteristics of many hemoproteins: a survey of molecular weights, sedimentation coefficients, other molecular parameters and amino acid compositions, 117
Hormone levels of parents and sex ratios of offspring (letter), 139
HOUSTON, A. I. and MCNAMARA, J. M., Singing to attract a mate: a stochastic dynamic game, 57
HSU, J-P., Stochastic modeling of bacterial adhesion; a two-step mechanism with nonlinear adhesion rate, 9
Human blood, do residue levels of polychlorinated biphenyls (PCBs) produce mild hypothyroidism?, 231
Humoral immune response, model analysis of the bases of multistationarity in, 141
Hydration barrier and local restructuring, overcoming of, in membrane fusion, 411
Hypothyroidism, mild, is it produced by residue levels of polychlorinated biphenyls (PCBs) in human blood? 231

Immune response, humoral, model analysis of the bases of multistationarity in, 141
Immune system network theory, Kaufman-Urbain-Thomas, a critique (letter), 355
Ionization of clusters; pairwise isotropic interactions and individual site binding data, 427

JAMALUDDIN, M. P. and KRISHNAN, L.K., A rate equation for blood platelet aggregation, 257
JAMES, W. H., Hormone levels of parents and sex ratios of offspring (letter), 139
JEAN, R. V., A mathematical model and a method for the practical assessment of the phyllotactic patterns, 69

KAUFMAN, M. and THOMAS, R., Model analysis of the bases of multistationarity in the humoral immune response, 141
Kaufman-Urbain-Thomas immune system network theory, a critique (letter), 355
KITNEY, R. I. and TALHAMI, H., The zoom Wigner transform and its application to the analysis of blood velocity waveforms, 395
KOEHL, M. A. R. (see CHEER, A. Y. L.), 17
KOPPES, L. J., WOLDRINGH, C. L. and GROVER, N. B., Predicted steady-state cell size distributions for various growth models, 325
KOPPES, L. J. (see GROVER, N. B.), 337
KOZLOV, M. M. and MARKIN, V. S., Model of red blood cell membrane skeleton: electrical and mechanical properties, 439
KOZLOV, M. M. (see LEIKIN, S. L.), 411
KRISHNAN, L. K. (see JAMALUDDIN, M. P.), 257

LEGOVIĆ, T., Determination of parameters for food web models from field observations, 211
LEIKIN, S. L., KOZLOV, M. M., CHERNOMORDIK, L. V., MARKIN, V. S. and CHIZMADZHEV, Y. A., Membrane fusion: overcoming of the hydration barrier and local restucturing, 411
LILJENSTRÖM, H. and BLOMBERG, C., Site dependent time optimization of protein synthesis with special regard to accuracy, 41
LIN, J. (see MIZRAJI, E.), 163
LUSTMAN, L. (See AWERBUCH, T. E.), 219

MCKINNEY, J. D. and PEDERSEN, L. G., Do residue levels of polychlorinated biphenyls (PCBs) in the human blood produce mild hypothyroidism?, 231
MCNAMARA, J. M. (see HOUSTON, A. I.), 57
Mammalian cells, a model for the spatio-temporal organization of DNA replication in, 91
MARKIN, V. S. (see KOZLOV, M. M.), 439
MARKIN, V. S. (see LEIKIN, S. L.), 411

Mate attraction, and singing; a stochastic dynamic game, 57
Membrane fusion: overcoming of the hydration barrier and local restructuring, 411
Membrane skeleton, red blood cell; electrical and mechanical properties of a model, 439
MILLER, M. J., Sensitivity of RNA synthesis to actinomycin D inhibition is dependent on the frequency of transcription: a mathematical model, 289
Minimal inhibitory concentrations (MICs), a mathematical model for determination via diffusion assays, 219
MIZRAJI, E., ACERENZA, L. and LIN, J., Viscoelastic models for enzymes with multiple conformational states, 163
Molecular characteristics of many hemoproteins: a survey of molecular weights, sedimentation coefficients, other molecular parameters and amino acid compositions, 117
Morphogenesis, epithelial, model of pattern formation in, 369
Multiple conformational states, viscoelastic models for enzymes with, 163
Multiple oncogene pathways, activation of; model for experimental carcinogenesis, 177
Multistationarity in the humoral immune response, model analysis of the bases of, 141

Neural net model for the release of prolactin during pseudopregnancy in the rat, 359

Offspring sex ratios, and hormone levels of parents (letter), 139
OKUNO, Y. (see AZUMA, A.), 263
Oncogene pathways, multiple, activation of; model for experimental carcinogenesis, 177
Optimal body size and foraging: an overview, new data and a test of alternative models, 275
Optimality principles, time hierarchy in enzymatic reaction chains resulting from, 189
Optimization, time, site dependent, of protein synthesis, with special regard to accuracy, 41
Organisms, small, fluid flow through bristled appendages of; paddles and rakes, 17
Organization, spatio-temporal, of DNA replication in mammalian cells, a model for, 91

Paddles and rakes: fluid flow through bristled appendages of small organisms, 17
Parents, hormone levels, and sex ratios of offspring (letter), 139
Pathways, oncogene, multiple, activation of; model for experimental carcinogenesis, 177
Pattern formation in epithelial morphogenesis, a model, 369
Patterns, phyllotactic, a mathematical model and a method for practical assessment of, 69
PEDERSEN, L. G. (see MCKINNEY, J. D.), 231
Phototropism, *Phycomyces*, spatial factors in; analysis of balanced responses, 301
Phycomyces phototropism, spatial factors in; analysis of balanced responses, 301
Phyllotactic patterns, a mathematical model and a method for practical assessment of, 69
Platelet, blood, aggregation, a rate equation for, 257
Polychlorinated biphenyls (PCBs), do residue levels in the human blood produce mild hypothyroidism?, 231
Prolactin release during pseudopregnancy in the rat, a neural net model for, 359
Proof of a neglected proof (letter), 453
Protein synthesis, site dependent time optimization of, with special regard to accuracy, 41
Pseudopregnancy in the rat, a neural net model for the release of prolactin during, 359

Rakes and paddles: fluid flow through bristled appendages of small organisms, 17
Rat, a neural net model for the release of prolactin during pseudopregnancy in, 359
Reaction chains, enzymatic, time hierarchy in, resulting from optimality principles, 189
Red blood cell membrane skeleton; electrical and mechanical properties of a model, 439
Replication of DNA in mammalian cells, a model for the spatio-temporal organization of, 91
Residue levels of polychlorinated biphenyls (PCBs) in the human blood, do they produce mild hypothyroidism?, 231
RNA synthesis, sensitivity to actinomycin D inhibition is dependent on the frequency of transcription; a mathematical model, 289
ROWE, G. W., A dynamic game theory model of a diploid genetic system, 243

SAROFF, H. A., The ionization of clusters. II. Pairwise isotropic interactions and individual site binding data, 427
Samara, *Alsomitra macrocarpa*, flight of, 263
SCHUSTER, S. and HEINRICH, R., Time hierarchy in enzymatic reaction chains resulting from optimality principles, 189
Sedimentation coefficients; molecular characteristics of many hemoproteins, 117
Sex ratios of offspring, and hormone levels of parents (letter), 139
Singing to attract a mate: a stochastic dynamic game, 57
Site dependent time optimization of protein synthesis with special regard to accuracy, 41
Size, body, optimal, and foraging; an overview, new data and a test of alternative theories, 275
Size distributions, cell, steady-state, predicted, for various growth models, 325
Size distribution, theoretical and experimental, a comparison; elongation and surface extension of individual cells of *Escherichia coli* B/r, 337
SIZUO, Y., A proof of a neglected proof (letter), 453
Spatial factors in *Phycomyces* phototropism: analysis of balanced responses, 301
Spatio-temporal organization of DNA replication in mammalian cells, a model for, 91
Stable strategy, evolutionarily, on the definition of, 349
Steady-state cell size distributions, predicted, for various growth models, 325
STEINHARDT, A. R. (see FUKSHANSKY, L.), 301
Step testing for estimating aerobic capacity, an anatomical model to determine step height in, 1
Stochastic dynamic game; singing to attract a mate, 57
Stochastic modeling of bacterial adhesion: a two-step mechanism with nonlinear adhesion rate, 9
Strategy, evolutionarily stable, on the definition of, 349
Surface extension of individual cells of *Escherichia coli* B/r; comparison of theoretical and experimental size distribution, 337

TAKAHASHI, M., A model for the spatio-temporal organization of DNA replication in mammanlian cells, 91
TAKIZAWA, N. (see HORIE, S.), 117
TALHAMI, H. (see KITNEY, R. I.), 395
THOMAS, G. (see ANNINOS, P.), 359
THOMAS, R. (see KAUFMAN, M.), 141
Time hierarchy in enzymatic reaction chains resulting from optimality principles, 189
Time optimization, site dependent, of protein synthesis, with special regard to accuracy, 41
Transcription, sensitivity of RNA synthesis to actinomycin D inhibition is dependent on the frequency of; a mathematical model, 289

Velocity waveforms, blood, the zoom Wigner transform and its application to the analysis of, 395
VICKERS, G. T. and CANNINGS, C., On the definition of an evolutionarily stable strategy, 349
Viscoelastic models for enzymes with multiple conformational states, 163

Waveforms, blood velocity, the zoom Wigner transform and its application to the analysis of, 395
Wigner zoom transform and its application to the analysis of blood velocity waveforms, 395
WOLDRINGH, C. L. (see GROVER, N. B), 337
WOLDRINGH, C. L. (see KOPPES, L. J.), 325

ZARAISKY, A. G. (see BELINTSEV, B. N.), 369
Zoom Wigner transform and its application to the analysis of blood velocity waveforms, 395
